

CRD Sewage Works

As part of the work to build the Clover Forcemain along Dallas Road, the contractor, Windley Contracting Ltd., is currently completing pre-excavations between Niagara and Montreal streets in preparation for the pipe installation expected in January 2019.

This work includes excavation, drilling and blasting rock, backfilling, and temporary restoration, which are all common activities for this type of construction.

JBNA has received complaints about the blasting associated with the project. We advise residents near the recent blast-site to examine their buildings for structural damage. Should any damage be found, we suggest you contact the CRD or Windley Contracting Ltd at the earliest opportunity.

Windley will be shutting down work for the holidays December 21, returning January 2.

Forcemain installation is anticipated to begin January 2nd in Section 1 (between Niagara and Dock streets) and also in Section 7 (between Clover Point and Cook Street).

Residents with questions or concerns can contact the Project 24 hours a day at 1-844-815-6132 and wastewater@crd.bc.ca or **Evan Southern, Director of Communications & Stakeholder Engagement** at 250-360-3634 or esouthern@crd.bc.ca

The JBNA Board anticipates meeting with the CRD team early in 2019 to discuss resident communication needs in the months ahead.
