

Siding Replacement

At St Peter's we have siding on the upper section of the south, east and west sides of the office and meeting room structure at the back of the church that is in very poor condition. It is proposed to replace this deteriorated original cedar siding with cement board. We have one proposal for \$9,300 to remove and dispose of the old siding and replace with prepainted cement board. Adding a contingency of \$900 gives us a total budget of \$10,200 for this project.

At the June 18 Parish Council meeting it was agreed that we would evaluate where we are financially at the end of July and if all is good we would proceed with this project at that time.
