

Protocols Related to Community Users

All community user groups must submit a safety plan to the parish at least TEN days before resuming activity. This plan will address vaccination requirements, social distancing, personal hygiene measures and facility sanitizing measures and must comply with the following:

1. Hygiene protocols must be communicated to participants and ensured by organizer.
2. The organizer is responsible for ensuring that all participants are vaccinated.
3. Participants should be instructed to administer their own wellness check and stay home if feeling unwell.
4. If possible, the entrance and exit doors should be different.
5. The user will provide hand sanitizer or direct participants to the nearest washing station. Upon entry, all participants must sanitize or wash their hands.
6. The user must provide a sign-in sheet to collect all contact information to assist with possible contact-tracing if requested by the province. Contact information must be kept for 30 days by the user and then destroyed.
7. User groups should have a participant assigned to be a "safety monitor" to ensure compliance with all facility protocols.
8. Social distancing must be maintained.
9. Masks are strongly recommended to be worn indoors at this time. (Other than exceptions for medical or accessibility reasons.)
10. Washroom use must be consistent with parish protocol, as follows: the group must maintain one person per use and must sanitize washroom after each use.
11. Users must sanitize common surfaces before and after gathering, and other necessary cleaning must be done before leaving.
11. If there is more than one user group in the facility at the same time, it must be ensured that there is no cross contact between groups.
12. There will be NO use of facility kitchens permitted for any reason.
13. Participants may bring their own self-contained beverages or snacks. There must be NO sharing of food or beverages. There must be NO preparation of food or beverages (including tea, coffee, cookies, etc.).
