### India Missions - Mani Pagidipalli

After months of waiting, the Oxygen Generator has begun to make its way to our place in multiple installments. We intend to finish setting up the entire machine before the 3rd wave of COVID hits our area. This heavy medical grade machine produces 60 Cubic Meters of oxygen per hour. That amounts to 1.5 Million liters of oxygen per day! At this level of production we will be able to help hundreds of patients and their families through our free hospital every single day.

Y'all are making the church in India look good among those who do not yet know the Lord!

The opportunity to contribute toward this Oxygen Generator is still active as we move forward to finish up metal framed buildings for equipment, filling and storage. We also need to procure portable cylinders for usage.

Thank you for your continued love and support for the people of India in this time of crisis.

**Yours in Christ - Mani**
