Information re: H.A.V.E.'s Drinking Water Projects

- Since 1982 H.A.V.E. (with federal government help through CIDA) has provided over 1,000 safe drinking water systems, mainly in India.
- The aim of our WALK 2016 is to provide at least 3 more new wells
- The cost of one complete drilled well, including pump and platform, is about \$2,500 which will provide safe drinking water to a village of about 100 families.

On behalf of the numerous needy families for whom you are walking today, a special THANK YOU. Our annual WALK FOR WATER event will be enabling people to have safe drinking water and this basic human right will guarantee improved health and a better chance to survive. With the availability of safe drinking water, people have the time and energy to focus on improving other areas of their lives, namely educating their children and establishing small cash-producing businesses.

Directions to St. Monica's Church: On Highway #1 take "Exit 3 Horseshoe Bay Village". Follow directions to the Village (keep left). Proceed to the water (Bay St) turn left and follow the road as it turns into Nelson up the hill. At the top of the hill at the round-about, take the first right – St. Monica's Church is immediately on the right. You will be able to find parking on the street in front of the church. Alternatively, you can follow Marine Drive west to the round-about, 2nd right (Rosebery) for St. Monica's Church.
