

For Parish Council Members

We are hoping to have our final quotes and contract to install new flooring in the basement.

We are required to remove the two toilets in the washroom before the flooring can be installed there. One of them has been out of order for some time. It may be the time, therefore, to replace them both with dual flush toilets when the flooring is installed.

May we have a discussion and a vote to replace the toilets? We will also need to have some work on the sinks and counter.

There is hope to have some funds left over from the flooring to repaint the downstairs area. There is some work on corners and water damage on walls as well. The repainting would replace the dark varied colours with a neutral colour so the space can be used or rented by many groups.

We will need approval before proceeding with paint and repair work. We are working on getting painting quotes. Some fundraising or other monies will be required to complete the work.

Respectfully submitted,

Terry Needham
