PARISH NURSE'S NOTES – JANUARY 2025

NEUROPATHY

I had the opportunity to attend a presentation on Neuropathy. Presented by Cason Chiropractic practice in Harrisonburg. Go to their website: Casonchiro.com

Email: Casonwellness@gmail.com 540-433-6909

Can peripheral nerves heal? YES

Nerve cells need 2 things to heal:

1. FUEL
   - ✓ Electromagnetic infrared
   - ✓ Advanced nutrition
2. ACTIVATION
   - ✓ Electrostimulation

Common Signs & Symptoms:

- ✓ Numbness, burning pain, deep stabbing pain, walking with a shuffle, grip strength decreases, inability to feel hot or cold, loss of strength, cramping

Common Causes:

- ✓ Medications, infections, poor metabolic health, chemo therapy, chemical exposure, alcoholism, kidney disease, liver disease, autoimmune, nerve impingement

Their proprietary treatment program consists of 4 vital components:

1. Electromagnetic infrared therapy
2. Electrostimulation
3. Advanced nutrition therapy
4. In-clinic visits & online education

Using their comprehensive examination techniques, they will determine if you are a candidate for their neuropathy relief program.

Let me know if you are interested. I have some handouts I can share.
