

 Decentralized World

What is Web3?

Why Christians cannot enter into the
Luciferian Kingdom

Presented By:
Dr. June Knight-Wehr

Executive Summary

Web3 is a term used to describe the infrastructure or the bones of the Beast system. This is the skeleton of the world wide web - the www or 666 or bbb (build back better labeled by the United Nations).

Christians are not allowed to enter into this demonic realm

Who is the head of the Web3 Infrastructure?

President Donald J. Trump led the charge with this endeavor through many executive orders and the main installation of 5G (battery to the Beast) in 2020 when he was the President of the G7 with the United Nations and the Father of the Vaccine.

Key Stakeholders in Web3 World

Big Tech and Big Pharma are the biggest stakeholders in the world. They are the force behind the technology needed to steal the soul of every human who enters.

Global Economic Overview

The world is in the process now of switching from the old order to the new order. They call this Build Back Better. They are destroying the old economy to bring in the new Luciferian infrastructure made up of fake, synthetic fibers.

Impact of economic factors

Global

Globally all is being shaken right now. The formation of BRICS is a way for other nations to form an alliance without the petro dollar of the United States and begin to build the decentralized platform needed for Web3. They are tearing down old infrastructures and building new ones.

Church

The mainstream church led by NAR (New Apostolic Reformation) is working with the Beast to roll this out. They are pushing people towards this new model by working with President Trump and the Zionist movement which is bringing all of this in. They are including it in churches now and making it mainstream to adopt this new infrastructure. They are normalizing it.

The Root of Web3

Microsoft 060606

Patent

On March 26, 2020, Microsoft filed a patent for a body-interfaced cryptocurrency. That's right, a human body implanted microchip connected to a cloud computer system, harvesting biometric data. The crazy part? The patent number is 060606.

IG: CONNECTING CONSCIOUSNESS

Human body activity associated with a task provided to a user may be used in a mining process of a cryptocurrency system. A server may provide a task to a device of a user which is communicatively coupled to the server. A sensor communicatively coupled to or comprised in the device of the user may sense body activity of the user. Body activity data may be generated based on the sensed body activity of the user. The cryptocurrency system communicatively coupled to the device of the user may verify if the body activity data satisfies one or more conditions set by the cryptocurrency system, and award cryptocurrency to the user whose body activity data is verified. to be used for online payments or as a store of value, often using blockchain technology to record transactions.

Difference of Webs?

The world wide web is the internet system we use. When we get on a computer we enter the highway system. When we point to a domain name we are riding down the information highway to a street address. What is in that house we enter is the file. This is why this is under the Transportation Dept in the government. It is data and it travels (http & https). So, the information we receive is returned to us from the various addresses. It's a spider web with the main spider being the host of the data and the information travels down the legs of the spider and the stops to deliver are called NODES.

Web1

Read Only

We go to a website to read and learn. Only the machine gives information back to the reader.

Web2

Read/Write

Now we birth social media. The computer grants the opportunity to receive data from the user. Now we are exchanging information between man and machine.

Web3

Merger

Now the internet and machine enter the man and they become one. The internet is now in the brain of the human and the new kingdom enters the human temple.

Merger of Man and Machine

Through Elon's brain chip and the vaccine, the computer will enter in the human. The vaccine is the app. Moderna explains it as Software of Life. They all work together in Web3 and cryptocurrency. No more need to have a cellphone or computer with monitors. The whole infrastructure of the web will be within the human temple through the jab and implant.

Announcement of the Merger by 2030!

Neuralink

Elon Musk believes that by the future, traditional smartphones will be replaced by Neuralink brain-computer interfaces. He envisions a world where users can interact with devices and communicate through their thoughts, rendering physical smartphones obsolete. Musk has expressed this view in response to questions about Neuralink and its potential applications

Brain-Computer Interfaces

He envisions Neuralink's technology allowing users to control devices and communicate with others using their thoughts.

What is Petro-Dollar?

Petrodollars are dollars paid to oil-producing countries for their exports. Petrodollars are not a distinct currency; they are simply the U.S. dollars accepted as payment

Money made from the earth -
trees and minerals

From the export of
petroleum

Money made from God's
Earth. It's Natural

Digital Money - Cryptocurrency

Cryptocurrency is a digital or virtual currency that uses cryptography for security, operates on a decentralized network, and isn't controlled by a central authority like a bank or government. It's designed to be used for online payments or as a store of value, often using blockchain technology to record transactions.

Root word is
Crypt

Means Death

Is Fake and
Synthetic - Made
out of Data - thin
air

The process is
gambling.

It's like a mouse
on a wheel -
greed

Why is it considered Gambling?

Cryptocurrency is sometimes compared to gambling due to its inherent volatility and the potential for significant financial gains or losses.

Cryptocurrency markets are known for their extreme price fluctuations, which can lead to rapid and substantial gains or losses

The value of cryptocurrencies is often influenced by market sentiment, news events, and speculation, making it difficult to predict future price movements.

✓ Goes up and down - unstable

✓ Money out of data - stealing

✓ Partners with blockchain technology

✓ Get-rich-quick mentality

What is Blockchain?

Blockchain is a decentralized, digital ledger that records transactions in a secure and transparent way. It functions as a shared, unalterable record across a network of computers, making it resistant to tampering and ensuring a verifiable history of transactions.

- ✓ Decentralized Platform
- ✓ Hivemind
- ✓ Beast Circular System - Veins

It is a system in which a record of transactions, especially those made in a cryptocurrency, is maintained across computers that are linked in a peer-to-peer network.

Key Characteristics of Blockchain:

It records transactions in "blocks" that are linked together, creating a chain. This chain is secure because it's difficult to alter any past record without changing all subsequent blocks, which requires the agreement of the entire network. It's like a shared, tamper-proof notebook that everyone can see but nobody can erase.

✓ Decentralized

✓ Distributed

✓ Immutable

✓ Secure

✓ Transparent

Decentralized

Hivemind

Data is stored across many computers in the network, not in a single location.

Connected on the Net as ONE

All the humans on the internet are now one with all the others in a hivemind. They each share each other's information. It's the Tower of Babel of the Satanic kind. The merging of humanity.

Distributed

ONE WORLD ORDER

The ledger is shared among all participants in the network, allowing them to verify transactions and maintain a consistent record.

We the People Rule

This means that everyone in the network has a copy of the ledger, and changes are made and verified by consensus among the participants.

Immutable

Permanent

Once a transaction is recorded and added to a block, it cannot be altered or deleted.

Everyone will know

In the blockchain and cryptocurrency space, immutability refers to the characteristic of data that cannot be altered or deleted once it has been recorded

Secure

Lucifer Owns It - It's Digital

Cryptography is used to secure the blocks and the chain, ensuring data integrity and preventing unauthorized access.

You're Locked In

Fixed or fastened so as not to give way, become loose, or be lost. Once it's complete (Affirmed), then it's permanent. It is there forever because everyone knows. One mind and one accord Luciferian style.

Transparent

Open to Inspection by Everyone

All transactions are publicly recorded on the blockchain, allowing anyone to view and verify them.

No More Privacy

In this kingdom, it's all about the masses' opinions. So, they do not like individualism or people to think for themselves. You must go along with the masses (of which can be swayed by propaganda and media).

How it Works

Blocks

Data is grouped into blocks, each containing information about transactions, a timestamp, and a cryptographic hash of the previous block.

Consensus

A consensus mechanism (like proof-of-work or proof-of-stake) ensures that all participants agree on the order and validity of the transactions before they are added to the blockchain.

Linking Blocks

Blocks are linked together in a chronological order, forming the "chain".

Supply Chain Management

Tracking the movement of goods and products

Digital identity management

Securing and verifying identities

Healthcare record keeping

Providing secure and transparent storage of patient data

Smart contracts

Automating agreements and transactions based on pre-defined conditions.

Voting systems

Ensuring the integrity and transparency of elections

Impact of Blockchain Infrastructure

Think of it as a record book for transactions. It keeps track of what's happening, like who owns what or who made a payment.

What is Web3 Definition

Web3 refers to the third generation of the internet, characterized by its focus on decentralization, user ownership, and increased privacy. It aims to shift power from centralized entities like tech giants to individual users, providing them with greater control over their data and online experience

Decentralization:

Web3 utilizes technologies like blockchain, cryptocurrency, and smart contracts to distribute control and decision-making across a network, rather than relying on a single authority.

User Ownership

Users have more control over their data and can choose how it's used and shared

Privacy

Web3 aims to enhance privacy by giving users more control over their data access and usage

Interoperability

Different platforms and systems can integrate seamlessly, allowing for easier data and asset transfers

Permissionless and Trustless

Anyone can participate in the system without requiring permission or relying on a third-party intermediaryeasier data and asset transfers

Examples of Web3 Technologies

Web3 is the idea of a new, decentralized internet built on blockchains, which are distributed ledgers controlled communally by participants.

Blockchains

NFTs (Non-Fungible Tokens)

Cryptocurrencies

DAOs (Decentralized Autonomous Organizations)

Smart Contracts

Vaccine Injection & Installation of the App

Key Takeaways

Important to Know about getting involved with Web3 and Lucifer's New World Order

Blockchains - Distributed ledgers that provide a secure and transparent way to record transactions and data.

Cryptocurrencies - Digital or virtual currencies used in Web3 systems for transactions and incentives.

Smart Contracts - Self-executing agreements written in code that automate transactions and processes.

Key Takeaways

Important to Know about getting involved with Web3 and Lucifer's New World Order

NFT's - are blockchain-based tokens that each represent a unique asset like a piece of art, digital content, or media.

DAO's - Online communities that manage their operations using blockchain technology and smart contracts

Hivemind - A "hivemind" refers to the collective consciousness of a group, especially online, where opinions and thoughts are shared and regarded as a single, unified entity

Spiritual Reasons Why

Web3 is Lucifer's World where he now has eyes everywhere and is the caretaker of man by merging with his temple and sitting at the throne of their heart

Mark of the Beast

Not Trusting in God

Merging with Machine

**Horizontal versus Vertical with
God being #1 in your life**

Gambling & Sin

**One world order
and one world religion**

Spiritual Reasons Why

Revelation 13:16-18

Mark of the Beast

Revelation 13:16:

"And he causeth all, both small and great, rich and poor, free and bond, to receive a mark in their right hand, or in their foreheads".

Revelation 13:17:

"And that no man might buy or sell, save he that had the mark, or the name of the beast, or the number of his name".

Revelation 13:18:

"Here is wisdom. Let him that hath understanding count the number of the beast; for it is the number of a man: and his number is Six hundred and sixty six."

Spiritual Reasons Why

2 Thessalonians 2:3-4

Merging with Machine

2 Thessalonians 2:3:

"Let no one deceive you in any way. For that day will not come unless the rebellion comes first, and the man of lawlessness is revealed, the son of destruction". This verse warns against being misled into thinking the Lord's return is imminent, stating that a major apostasy and the appearance of a specific figure, the "man of lawlessness," must occur first.

2 Thessalonians 2:4:

"who opposes and exalts himself against every so-called god or object of worship, so that he takes his seat in the temple of God, proclaiming himself to be God.". This verse describes the characteristics of the "man of lawlessness." He will challenge and elevate himself above all things considered divine, including the true God, and will even claim to be God while sitting in the temple of God.

Spiritual Reasons Why

Why gambling is considered a sin: 1 Timothy 6:10
"For the love of money is a root of all kinds of evil."

Gambling & Sin

Greed and Covetousness: Gambling often involves the desire for quick and easy wealth, which contradicts biblical teachings against greed and covetousness.

Love of Money: The Bible warns against the love of money, stating that it's the root of all kinds of evil.

Stewardship: Gambling can be seen as a misuse of God's gifts, such as time and money, which should be stewarded wisely.

Lack of Trust in God: Gambling can indicate a lack of trust in God's provision and a desire to control one's financial circumstances through chance rather than faith.

Potential for Harm: Gambling can lead to addiction, financial ruin, and harm to relationships and families, causing significant suffering

Spiritual Reasons Why

Proverbs 3:5-6 and Psalm 118:8

Not Trusting in God

Proverbs 3:5-6, which instructs, "Trust in the Lord with all your heart and lean not on your own understanding. In all your ways submit to him, and he will make your paths straight". Psalm 118:8 reinforces this, stating, "It is better to take refuge in the Lord than to trust in man".

Spiritual Reasons Why

You will be required to be a man-pleaser versus a God-pleaser. You will be conformed into the hivemind and be swept away from individual thinking.

Horizontal versus Vertical with
God being #1 in your life

Galatians 1:10 - "Am I now seeking the approval of men, or of God?
Or am I trying to please men? If I were still trying to please men,
I would not be a servant of Christ."

This verse directly addresses the conflict between pleasing people
and serving Christ, suggesting that genuine servitude requires
prioritizing God's approval

Spiritual Reasons Why

Lucifer is building his new kingdom without God. He's destroying all natural things to make way for the new Metaverse false reality with him as god.

**One world order
and one world religion**

Daniel 7:

This chapter depicts four beasts representing successive empires, with the fourth beast being a fearsome entity symbolizing a global power that will dominate the world.

Revelation 13:

This passage describes a beast rising from the sea with ten horns and seven heads, symbolizing a powerful, deceptive force that will control global trade and worship.

Revelation 17:

This chapter describes a "harlot" sitting on a beast, representing a corrupt world power that will deceive nations and bring about judgment.

Daniel 8:

This chapter describes a ram and a goat representing powerful empires, with a "little horn" emerging from the goat symbolizing a future leader who will deceive and control the world.

No more natural order

Lucifer is fake and synthetic. He wants to destroy all that is the testimony of God. All natural things and processes. He wants to be the provider, comforter, healer, etc.

Grass, water, etc.

**Natural Healing by God
Food, Medicines, etc.**

Procreation (Children)

**Human Body - wants
to enter into the temple**

Relationships

**Currency
& Financial Order**

Is AI our God?

Do we trust our God or not?

Adopting the new technology

Is removing your humanity

God leaves the human

When they become part of the hivemind, they are given over.

They divorce God

Like children of Israel when they wanted Pharoah and Egypt, they left their God. We must trust God.

Who's Our Source?

God will prove Himself as the source. The choices people are making now is based on their lusts.

In a Nutshell

Web3 and the Decentralized World is not for Christians. It's for judgment to the people who do not trust in God. We are the modern day Children of Israel. Do we trust God or not?

James 1:14-15 states that "each one is tempted when they are dragged away by their own evil desire and enticed," and that "after desire has conceived, it gives birth to sin; and sin, when it is full-grown, gives birth to death"
