

Week 11: Jachin & Boaz

1 Kings 7:1-22 (ESV)

1 Solomon was building his own house thirteen years, and he finished his entire house.
2 He built the House of the Forest of Lebanon. Its length was a hundred cubits and its breadth fifty cubits and its height thirty cubits, and it was built on four] rows of cedar pillars, with cedar beams on the pillars. 3 And it was covered with cedar above the chambers that were on the forty-five pillars, fifteen in each row. 4 There were window frames in three rows, and window opposite window in three tiers. 5 All the doorways and windows had square frames, and window was opposite window in three tiers. 6 And he made the Hall of Pillars; its length was fifty cubits, and its breadth thirty cubits. There was a porch in front with pillars, and a canopy in front of them. 7 And he made the Hall of the Throne where he was to pronounce judgment, even the Hall of Judgment. It was finished with cedar from floor to rafters. 8 His own house where he was to dwell, in the other court back of the hall, was of like workmanship. Solomon also made a house like this hall for Pharaoh's daughter whom he had taken in marriage. 9 All these were made of costly stones, cut according to measure, sawed with saws, back and front, even from the foundation to the coping, and from the outside to the great court. 10 The foundation was of costly stones, huge stones, stones of eight and ten cubits. 11 And above were costly stones, cut according to measurement, and cedar. 12 The great court had three courses of cut stone all around, and a course of cedar beams; so had the inner court of the house of the Lord and the vestibule of the house. 13 And King Solomon sent and brought Hiram from Tyre. 14 He was the son of a widow of the tribe of Naphtali, and his father was a man of Tyre, a worker in bronze. And he was full of wisdom, understanding, and skill for making any work in bronze. He came to King Solomon and did all his work. 15 He cast two pillars of bronze. Eighteen cubits was the height of one pillar, and a line of twelve cubits measured its circumference. It was hollow, and its thickness was four fingers. The second pillar was the same. 16 He also made two capitals of cast bronze to set on the tops of the pillars. The height of the one capital was five cubits, and the height of the other capital was five cubits. 17 There were lattices of checker work with wreaths of chain work for the capitals on the tops of the pillars, a lattice for the one capital and a lattice for the other capital. 18 Likewise he made pomegranates in two rows around the one latticework to cover the capital that was on the top of the pillar, and he did the same with the other capital. 19 Now the capitals that were on the tops of the pillars in the vestibule were of lily-work, four cubits. 20 The capitals were on the two pillars and also above the rounded projection which was beside the latticework. There were two hundred pomegranates in two rows all around, and so with the other capital. 21 He set up the pillars at the vestibule of the temple. He set up the pillar on the south and called its name Jachin, and he set up the pillar on the north and called its name Boaz. 22 And on the tops of the pillars was lily-work. Thus the work of the pillars was finished.

Psalm 73:26 (ESV)

My flesh and my heart may fail, but God is the strength of my heart and my portion forever.

NOTES

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
