Dear Brethren,

This note is about Pablo Araya, 13-year-old son of missionary Danny Araya in Costa Rica. He has been struggling with a hemoglobin disorder and will need to undergo a bone marrow transplant. Tests were done to see whether Dani, his wife Cindy, or his daughter Sofia would be the best donor, and the results showed that the sibling Sofia was the best match.

The exact time for the procedure is not yet known, since Pablo must go through a series of tests to check his body for any ailments that would affect the success of the transplant. His body under the chemotherapy treatment will lose its immunity, so they must be careful to see that he has no elements of disease or sickness before the surgery.

After the completion of the transplant procedure, Pablo must remain isolated in the hospital for one month, along with only one parent, and that will be his mother, Cindy. This will be an indeed trying time for the Araya family. Please keep Pablo in your prayers. May God's merciful hand guides to the doctors and may his peace govern the hearts of the Araya household. Please remember Sofia, that God's peace and strength will be with her as she goes through the donor's part in this delicate process.

Praying for God's will and loving mercy,

Bro. Carl, GPA

Luke 19:10
