

What is this role all about?

Our back-up broadcasters are comfort bringers to our broadcaster, leaders, servers and community members in our liturgical spaces. They are there ready to fill in if something goes wrong with our broadcasters device, or if we have any other technical glitches which might disrupt worship.

Tips for the Backup Broadcaster role at Services:

1. Download service from 'Budding Services' folder and have it open on your computer so that you can jump in and screen share if the Broadcasters device has troubles or they lose connection.
2. More details on how to Screen share and run liturgy (if needed) can be found in the [Broadcasting Tutorial Video](#).
3. Have all the songs open on a browser with ad-blocker on (Brave is a good browser for this: <https://brave.com/>)
4. Join in to the service a little early so your broadcaster doesn't panic that you aren't there.
5. Ask the meeting 'host' (Zoom buttons person) to make you a 'co-host', so that you have some extra controls available throughout the service.
6. If you are recording the sermon then when it comes time 'pin' the preachers video box by using the three dots at the corner of their video box and selecting 'pin' from the dropdown menu.
7. Then click 'record to the cloud'.
8. Once the sermon is finished click 'stop recording' button.

Thanks for being a backup for the broadcaster! It means a lot to know that there is someone ready to save the day if tech gremlins strike!

A prayer to say before being back-up broadcaster:

Loving God, as I offer this supportive role please fill me with your Holy Spirit, so that I can be a reassuring presence for my community. Thank you for our broadcaster and all others who serve alongside me today, please bless their ministries. In the name of Jesus, I pray. Amen.
