**Opening & Closing for Exhumation or Removal**

Removal from a columbarium niche will be carried out by the Cemetery Operator. Below-ground exhumation may require significant documentation and prior approval by the Cemetery Operator and/or provincial authorities. The exhumation will be conducted by contract with a cemetery service provider acceptable to the Cemetery Operator. All actual costs are to be paid by the person(s) requesting exhumation or removal.

\*\* These are basic administrative charges. In many instances, there will be additional charges for equipment, labour, and materials. Inquire at Church Office before making plans; this is especially important when a change of marker will require the removal of a previous marker. All opening and closing for interment of human remains will be carried out by a contractor acceptable to the Cemetery Operator, at the expense of the interment right holder.
