Module 3: Healing - Chapter 2

Lessons 1-8 | Final Group Discussion & Reflection Guide

The lesson titles are included as reminders of the eight teachings you completed. Use the lines to jot down thoughts before sharing, or simply use the questions for group discussion. You do not need to answer every question.

Lesson 1 - The Power of God's Word

1. Looking back over all eight lessons, what is the single biggest truth about healing that you are taking away from this study?

Was there something you understand differently now than you did before we started?

2. Which Scripture from this entire study has become the most meaningful to you personally?

Why did that particular Scripture stand out?

3. Has this study changed the way you respond when your circumstances seem to contradict what God's Word says?

What does it look like practically to give God's Word the final say without pretending that circumstances do not exist?

Lesson 2 - The Power of Our Words

4. What have you learned about the connection between your heart, your thoughts, and your words?

Have you noticed anything you have been thinking or saying that you now want to change?

Lesson 3 - Faith for Healing

5. Has your understanding of faith changed during this study?

What is the difference between trusting God and trying to make something happen by having enough faith, saying the right thing, or doing everything perfectly?

6. Which lesson challenged you the most - and why?

Was there something you initially struggled with, questioned, or had to rethink?

Lesson 4 - Ways Jesus Healed

7. After studying the different ways Jesus healed people, what stood out to you about the fact that He did not minister to everyone in exactly the same way?

How does that help keep our faith in Jesus rather than in a method or formula?

Lesson 5 - More Ways Jesus Healed

8. What role does relationship with Jesus play in everything we have studied?

If we took away all the techniques - confession, laying on of hands, points of contact, fasting, Communion, and so forth - why must Jesus Himself remain the center?

Lesson 6 - The Authority to Heal

9. What did you learn about the difference between having authority and actually using authority?

How did the teaching about submission to God affect your understanding of spiritual authority?

10. Has this study changed the way you would pray for or minister to someone else who needs healing?

What would you do differently today than you might have done before these eight lessons?

Lesson 7 - Mental Health

11. What does taking thoughts captive and replacing wrong thinking with God's Word look like practically in your own life?

Can you identify a thought pattern that you recognized during this study that you want to replace with God's truth?

12. What is the difference between knowing these truths intellectually and actually living from them when you are facing sickness, fear, pain, or a difficult report?

What becomes harder when the pressure is real?

Lesson 8 - Imagination

13. When you picture your future, are you seeing primarily through the lens of your circumstances - or through the promises of God?

Is there an old picture of yourself or your future that you believe needs to change?

14. Throughout these lessons, we have seen a progression: God's Word -> what we believe -> what we think about -> what we speak -> how we act. Where have you grown the most?

Where do you still want to grow?

15. What is one truth from this study that you do not want to lose six months from now?

What can you intentionally do to keep that truth active in your life?

Final Personal Reflection

Before this study, I believed...

After this study, I now believe...

Because of what I've learned, I am going to...

Final Group Question

What changed in you?

Consider a belief about God, healing, yourself, your authority, your words, your thoughts, how you pray for others, how you respond to symptoms, or your confidence in God's Word.
